SPIRÆA ASTILBOIDES.

One of the most handsome of hardy herbaceous perennials, and one which has been certificated both by the Royal Horticultural and Royal Botanic Societies on account of its great merit. The stems are furnished with triternate leaves, and terminated by compound feathery branches of elegant white flowers. It will be a charming and indispensable plant for pot culture as a decorative object in the early spring months, on account of its free growth and beautiful flowers, which are produced in the greatest profusion. This is one of the Twelve New Plants with which Mr. W. B. gained the First Prize at the Great Show of the Royal Horticultural Society, held at Kensington, in 1882. 10*s.* 6*d.*

SPIRÆA BARBATA (Hoteia japonica).

Cannot be too highly appreciated as a decorative plant for early forcing, its pretty erect shining green foliage, surmounted by numerous beautiful and graceful panicles of white inflorescence, giving the whole plant an elegant appearance, and rendering it at once most pleasing and useful for decorative purposes.

Strong imported clumps, 6s., 9s., and 12s. per dozen.

SPIRÆA PALMATA.

One of the most beautiful hardy plants in cultivation, with deep purple-red stems and branches, and crimson-purple broad corymbs of flowers. It is a native of Japan. 9s. per dozen.

FREESIAS.

The chaste and fragrant flowers of these beautiful Cape bulbs render them of the greatest value for decorative purposes, especially where cut flowers are required during the winter months; they grow about 9 inches high, producing 6 to 8 flowers, the fragrance of which is most delightful. They can be easily forced, and should be planted 6 to 12 bulbs in a pot.

IRIS.

ENGLISH (I. anglica or Xiphioides).

For brilliancy of colour and fine vigorous foliage the English Iris takes rank amongst the handsomest of flowering bulbs. They greatly resemble the Spanish Iris in style of growth, attaining a height of about 2 feet, and produce, during June and July, a succession of large and beautiful flowers.

AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then when required, if started in a gentle heat they quickly develope their large Lily-like blossoms, which are of various colours, generally embracing crimson, white and red, scarlet, rose-flaked, striped white and crimson, with various shades of colours.

EUCODONIAS.

These exceedingly pretty hybrid Gesneraceous plants have nicely tinted ornamental foliage, and extremely beautiful flowers, which are freely produced on small plants. The flowers are nearly the size and form of a drooping Gloxinia, but have the soft colouring and elegant markings of some of the attractive Tydæas. 1*s.* and 1*s.* 6*d.* each, according to sorts.

GESNERAS (NÆGELIAS).

The value of Gesneras as decorative plants can scarcely be over-estimated. Most of them have rich velvet-like foliage, which in the respective kinds, varies from green to crimson. If only grown for the foliage they are very attractive, but they produce splendid pyramidal spikes of blossom, which are extremely handsome. Originally the principal colour was orange-scarlet ; now, as the result of fertilisation, there are various colours and shades, added to which the spotting on the flowers of some of the varieties is extremely pretty. Selections of good varieties at 30s. and 42s. per dozen.

See also page 26.

GLOXINIA INSIGNIS, this distinct variety produces its flowers during the autumn and winter; colour bluish lilac, marked with a large crimson blotch at the base of the tube . .	2	6
GLOXINIA MACULATA SCEPTRUM, a magnificent hybrid, with extra large erect cordate foliage; it produces a rigid terminal inflorescence, exceeding twenty inches in height, which bears majestically its large, clear lilac, well-formed blooms	2	6

TYDÆAS.

These beautiful and showy Gesneraceous plants can be supplied in dormant rhizomes from November to April. Their free-blooming character and easy cultivation, combined with great diversity of colour, render them of the greatest value for decorative purposes generally; 18s., 24s., 30s. and 42s. per dozen, according to sorts.

SEED FROM PRIZE STRAINS.

PRIMULA SINENSIS.

PRIMULA SINENSIS FIMBRIATA MONT BLANC.—Unrivalled in the pureness of its snowy white, densely fringed flowers, which are of great size and substance. 2*s.* 6*d.* and 5*s.* per packet.

PRIMULA SINENSIS FIMBRIATA SPLENDIDA.—The flowers of this magnificent strain are a deep crimson, beautifully fringed, and of immense size and substance. 2*s.* 6*d.* and 5*s.* per packet.

Mr. W. Bull has great confidence in offering the above unrivalled strains of Chinese Primulas. They are unsurpassed in the great breadth and substance of their beautifully fringed flowers, which are borne in immense heads, growing well above the foliage. They are of fine habit, and can be highly recommended.

PRIMULA SINENSIS FIMBRIATA ALBA
PRIMULA SINENSIS FIMBRIATA RUBRA
PRIMULA SINENSIS FIMBRIATA FILICIFOLIA ALBA
PRIMULA SINENSIS FIMBRIATA FILICIFOLIA RUBRA
} Extra choice.

These varieties possess most elegantly fringed edges, and are offered with the greatest confidence. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULA SINENSIS FIMBRIATA "Bull's Premier Mixture." 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

Seed of Mr. William Bull's select strain of this useful and favourite plant is now offered in mixture containing all the new and most distinct colours and varieties; the many unsolicited testimonials received point conclusively to the fact of its being appreciated among growers as of unusual excellence. To distinguish this from the ordinary mixture of *P. alba* and *rubra* generally supplied, Mr. W. B. designates this choice mixture as above.

PRIMULA SINENSIS FIMBRIATA KERMESINA SPLENDENS.—A fine variety, with rich crimson-coloured flowers. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULA SINENSIS FIMBRIATA "VILLAGE MAID."—White striped with rosy carmine; splendid variety. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULA SINENSIS FIMBRIATA ALBA FL. PL.
PRIMULA SINENSIS FIMBRIATA ROSEA FL. PL.
PRIMULA SINENSIS FIMB. KERMESINA SPLENDENS FL. PL.

These double Primulas are a valuable acquisition, especially to cut from, as they do not drop their flowers like the single varieties. 3*s.* 6*d.* and 5*s.* per packet.
